To leverage my technical proficiency in Artificial Intelligence & Machine Learning to for designing innovative and intelligent solutions that address real-world challenges in automation I aim to grow as a **solution-driven engineer** contributing to futuristic and sustainable technological advancements while continuously expanding my knowledge and professional capabilities.

QUALIFICATIONS

Degree/	University/School	Passing Year
B.Tech- CSE	BIET, Lucknow	2023-27
12 th Class	SKD Academy	2022-23
10 th Class	SKD Academy	2020-21

ACADEMIC PROJECTS

1. Project Name/ Title: Fire Fighting Robot

- **Tools/ Technologies used:** IoT, Arduino Uno, sensors-actuators, Arduino C++
- **Description:** A sensor-based autonomous robot designed to detect and extinguish fire using flame sensors and a water pump system. Built on the Arduino Uno platform, it integrates motor drivers, relay modules, and BO motors to navigate and respond efficiently to fire sources, enhancing safety through automation and embedded control.

2. Project Name /Title: Driver Drowsiness System

- **Tools /Technologies Used:** Python, OpenCV, MediaPipe, NumPy, SoundAudio, Computer Vision, Facial Landmark Detection, Eye Aspect Ratio (EAR), Drowsiness Detection Algorithm, Real-Time Video Processing, Image Processing, Machine Learning (Basic), Alert System, Data Analysis.
- **Description:** An AI-based system developed in Python to monitor driver alertness using real-time video processing. It employs computer vision techniques with OpenCV and MediaPipe to detect facial landmarks and eye closure patterns, triggering an audio alert when signs of drowsiness are identified, enhancing road safety through intelligent automation.

SEMINARS / WORKSHOPS / CONFERENCES

- Attended an blockchain technology sponsored seminar on "Enhancing Cybersecurity using Blockchain Technology" held at Bansal Institute Of Engineering & Technology, LKO.

TECHNICAL SKILLS

- **Programming Languages:** Python, Embedded C
- **Database Management:** MySQL
- **Software Tools & Platforms:** GitHub, VS Code, Arduino IDE
- **Data & Analytics:** Data Structures and Algorithms

ACHIEVEMENTS AND EXTRA CURRICULAR ACTIVITES

- Earned 3rd Place in the "Idea Presentation" technical competition hosted by our college's Tech fest Avinya 2.0.

HOBBIES

- Going to the gym and working out
- Learning about Machine Learning and NLP.
